

31th March 2023

Local Rule at Zurich Airport

Additional airport departure slots between 22:00 and 22:20 LT

Introduction

The following procedure is binding for administering airport departure slots between 22:00 and 22:20 LT.

Zurich Airport is gradually increasing airport departure capacity between 22:00 and 22:20 LT by adjusting the total hourly movement value as of STT 2020. As of STT 2020, two additional airport departure slots are available during this time frame due to the adjustment of the hourly total of aircraft movements. The allocation of these additional slots is subject to the following conditions:

Additional airport departure slots between 22:00 and 22:20 LT

The coordinator will allocate these slots only as a series of slots to passenger flights and if the flight distance between Zurich Airport and the next destination is at least 5000 km or more. Stopovers are not permitted. In addition, they will only be allocated on a provisional basis for the first two seasons in order to determine their impact on the night curfew. The slots may be withdrawn the following year should unfavorable effects be identified.
